USE CASE 1: CENTRAL IT AS SHARED SERVICES

INSTALLATION OF A SHARED SERVICE IT

CLIENT PROFILE: International group of companies in the automotive sector

INITIAL SITUATION & OBJECTIVE: Centralisation of a previously decentralised IT organisation, taking into account decentralised flexibility and special features, such as the Principles of Data Access and Verifiability of Digital Documents (PDAVDD).

Objectives in detail:

- Modernisation of the data center and IT infrastructure
- Establishment of a central IT service provider
- Unification of the ERP system
- Establishment of a support hotline
- Central IT procurement
- Center of Excellence

FINANCIAL

- Realisation of economies of scale
- Bundled purchasing of IT

TAX

- Establishment of uniform transfer prices and transfer pricing systems
- Tax structuring (including integration into tax group)
- Tax audit of the service agreements

IT/CONSULTING

- IT strategy
- S/4 HANA consulting
- IT outsourcing

LEGAL

- Company formation and documentation
- Employment law aspects & data protection
- Intra-Group Service Agreement (SLA)

SYNERGY CONTROLLING

- Development of business cases
- Defining of the relevant KPIs
- Controlling of the Ist-Synergies

PROJECT-/ CHANGE MGMT.

- SAP Activate, Agile
- Coordination of the processes
- User training
- Development of a clear target picture
